Photographed Notes.—These are of a dull brownish color, and the engraving indistinct or blurred. Photograph bills are never black. A sure test of any note suspected of being a photograph is to touch it with a solution of Cyanide of Potassium when it will immediately fade out and turn white if it be a photograph.

Every counterfeit that has ever been made has one or more mistakes in it. Our aim is to show what that mistake is.

20s GREENBACKS.

A dangerous counterfeit. Green ink a good color, but the paper too yellow. Principal defect in the die. No clear and distinct lines around the 20. Looks more like a collection of several spots. Female well done, but the face rather coarser than the genuine.

Mutual National Bank, Troy, N. Y.

10s, imitation. Well executed and likely to deceive. Shading of "United States" lighter than the genuine.

First Nat'l Bank, Louisville, Ky.

Tioga National Bank, Owego, N. Y.

50s raised from 5. Well done.

First National Bank of Boston Mass.

5s, imitation. The engraving is fine and well done. The signatures of the President and Cashier are engraved. The Seal of the Treasury is a fac simile of the genuine. Examine the wording of the penalty on the lower corners of the back of the note. The bill is well calculated to deceive.

Flour City Nat'l B'k, Rochester, N. Y.

10s, imit. This bill is well executed, and a dangerous counterfeit. The die on the upper right end is very pale and has a speckled appearance in the imitation instead of a dark and lined appearance, as in the genuine; observe the small curved line under word "United;" in the imitation it connects the letters UNI, the genuine does not. The signatures are engraved, and the bill is 1/4 inch longer.

10s, imitation, (SECOND ISSUE.) Well done. The letters ROC in the word ROCHESTER, at the left end of the words FLOUR CITY, are quite indistinct in the counterfeit, but in the genuine they are clear and distinct.

TO OUR SUBSCRIBERS.

With the present number commences the Sixth volume of MENDELSON'S NATIONAL BANK NOTE REPORTER.

This Reporter having lately changed hands, we beg to assure the public that under its new management every effort will be made to sustain its wide spread reputation as an authority on those matters of which it treats.

Our thanks are due and hereby tendered to the United States Treasurer, to the Comptroller of the Currency, and to many gentlemen connected with banks, for their kind and most valuable assistance given to us in revising and correcting this Reporter. Many of these corrections will be noticed in the present issue and many others will appear in subsequent numbers.

The most particular attention will be given to the descriptions of the many counterfeit appearing, and these we will take pains to so accurately describe, that the poorest judge of money shall be able to detect them.

Changes in Banks and Bank-Officers will be duly noted.

The Price Current Reports are enlarged in this number, and we intend to still more extend them. The trouble and expense which we are willing to incur in obtaining them from first-class houses, will be a guarantee that they may be relied upon.

In short, nothing shall be left undone to make this Bank Note Reporter the most reliable and valuable publication of its kind.

With such assurance, we send to our subscribers, one and all, a kindly greeting, and "A HAPPY NEW YEAR.

Publisher and Proprietor.

NEW YORK, Dec. 28, 1868.

As we predicted in our issue of Dec. 15th, money has become more and more active, and the year 1868, is about to close on a stringent money market. This may be easily accounted for by: 1. The withdrawal from circulation of twenty millions of legal-tender notes; 2. Heavy remittances to the South and West respectively, for Cotton, Pork and other crops, amounting to over fifteen millions within thirty days; 3. The daily increasing demand for money, to be invested in the various branches of legitimate trade; 4. The concentration by National Banks of their funds to show off better for their quarterly returns. In none of these causes can we see anything alarming, as: 1. Those twenty millions having been withdrawn for very good reasons, (one being the extensive and perfect counterfeiting of the \$50 legal-tender), will be shortly re-issued in another form of the legal-tender; 2. Those remittances for crops will in the natural routine of trade return in due time to this business centre, probably with a considerable increase from profits; 3. The willingness of the legitimate trade to pay higher rates of interest appears to result from expectations of good profits in consequence of a general improvement of business, and ought, therefore, to be regarded as a healthy sign than otherwise; 4. The quarterly returns once published, the banks will then readily come to the relief of this market. With such reflections, we wish

to impart to our readers own hopes and expectations of great prosperity, which we wish the coming year may inaugurate for our beloved country,

A correspondent of the *N. Y. Sun*, writes as follows of the way Counterfeit Money is made:

"In the first place a perfect *fac simile* of the bill cannot be engraved by hand, as the most parts are engraved by machinery called lathe work. So you can see the impossibility of executing the work without its being immediately detected; that is, the lines on the figures and letters will not be the same as on the genuine. The genuine plates are engraved by the best workmen in the country, and with every facility for making a very neat engraving. On the other hand, the counterfeiters, not having such facilities, they make a bungling job.

"No doubt you will be surprised to learn the way the best counterfeiters are gotten up. A party of men, say from three to a dozen, get together and hold frequent meetings, and act according to a plan laid down. One or two will find out some copper-plate printer in the employ of the bank-note printing office—in fact, all such printers are known by the party. These men will manage to meet one of the printers in the evening, get acquainted, drink, and have a good time generally with him, and so proceed for a few evenings. Then they offer him from \$50 to \$150 to procure a certain kind of impression. This impression is made in this wise: The printer will take an impression upon tin foil from the plate from which he is printing, which can be done in a moment. Thus you see every line and size is obtained correctly. From this tin foil an electrotype plate is made. They then get some plate printer that can be found about the city, have a good time with him, and engage him for \$20 per day to do the printing. By this plan thousands of copies are struck off, which defy detection, except in the quality of the paper, which will slightly differ from the genuine. The place of manufactory is generally some distance from the city, like Staten Island, Flatbush, or sometimes Baxter-street, or similar localities in the city. It is a strange fact in every case where a party of this kind exists that every member lacks confidence in his associates. Every move made by one is narrowly watched by the others of the party. It would be death to any informant or spy that did not look well to himself."

The attention of our readers is particularly directed to the advertisement on the last page of the Reporter, concerning the novel SAFE manufactured by Mr. MARVIN. Any improvement in such a necessary article, tending to make it more secure against burglars, is always hailed with delight. It is for this reason that we speak of it, as its queer construction seems indeed to make it invulnerable, and to justify the manufacturers in claiming for it that it "cannot be sledged," and "cannot be wedged."

The AMERICAN STOCK JOURNAL (see advertisement on last page) should be in the hands of every one who has the care of horses or cattle. Its pages are filled with information that is valuable to all Farmers and Stock-Breeders. The JOURNAL is furnished at the low price of \$1.00 per year. Get it—it is a good investment.

The relation of the Government to the National Bank Currency does not seem to be generally understood, some persons contending that the Government is responsible for the notes of the banks, others that it is not. Practically, the former are right, theoretically, the latter. The law creating the banks provides that when any institution formed under it fails to redeem its circulation, the Treasurer of the United States shall give notice, at the expiration of thirty days, for holders of the notes to present them to him for redemption. He is then to pay the notes as fast as they come in, and indemnify the Government out of the bonds deposited as security by the bank. If the proceeds of the bonds are insufficient, then the Government is to have a first lien for the deficiency upon all the remaining assets of the bank. It thus results that while the Government does not formally guarantee the payment of the notes, it has promised to step in, in case of insolvency, and pay them, waiting for reimbursement until the bank can be wound up. Holders of National Bank bills therefore need not, under any circumstances, be alarmed at news of bank failures, for they are sure to be paid though no other creditor gets a cent.

A comparative statement of the condition of the Public Debt on December 1, 1867, and December 1, 1868, shows the following:

On December 1, 1867, the amount of debt less cash in the Treasury was \$2,501,205,751. On November 1, 1867, it was \$2,491,504,450, an increase of \$9,701,301, in which is included the sum of \$559,000 in bonds issued to the Pacific Railroad Companies. On the 1st of December, 1868, the debt, less cash in the Treasury, was \$2,539,031,844; on the 1st of November, 1868, it was \$2,527,729,552, an increase of \$11,902,292, including \$2,143,000 in railroad bonds.

Deducting the amounts of Pacific Railroad bonds in the above comparison, it will be seen that the increase of the public debt this month, as compared with the same month of last year, is nearly similar in amount; the difference being an increase of only \$616,989. The increase in both cases was caused by the payment of the semi-annual interest on the five-twenty Bonds.

TO OUR SUBSCRIBERS.

We are placing the imitations of National Bank Notes under the respective banks in the body of the Reporter, as the large number of counterfeiters recently put in circulation take up more space than we have room for on first and second pages. Many of these counterfeiters are so well executed, (especially those of the denomination of \$10 and \$100,) that it is almost impossible to detect them. We would say to our subscribers, examine carefully all bills on the National Banks, as the adoption of uniform plates for this currency adds extra facilities to counterfeiters, as a good counterfeit can easily be altered to any of these banks.

1000s, in centre, portrait of Robert Morris in green circle—right end M with 1000 across it; ONE THOUSAND DOLLARS on a green die below—left end, same as right.

COUNTERFEIT GREENBACKS.

1s, (1st kind) can be readily detected by the inferior style of the engraving, particularly the head of Chase. The mouth is crooked, the eyes imperfect, and the hair on the top of the head resembles side hair brushed over to cover baldness. The back is of a lighter green than the genuine.

1s, (2d kind) the general appearance is very coarse and may readily be detected; green ink is very pale. On the imitation there is a BLACK STRAIGHT LINE under the red figures on the upper part of the bill; none in gen.

2s, imit., well executed. Coat of Hamilton badly done. The shirt bosom of Hamilton is very dark and uneven, but in the genuine white and plain. The shading of the words "UNITED STATES" light and broken.

5s, 10s, genuine notes without the red seal, and others reported without the usual number being printed upon them.

5s, imit., words "United States" heavily shaded. Gen. are clear, lightly shaded and plain. The words "Patented 30th June, 1867," under the words N. York are not on the counterfeit bill. All the counterfeits are letter A, and are $\frac{1}{4}$ inch shorter than the genuine.

On the new series of letter "A," around the figure of Liberty on left end is a plain black line. On the counterfeits, this line along the bottom of the figure running towards the right of the note forms two distinct lines, on gen. only one. But this

may be a counterfeiter's dodge to have it described and alter it afterwards.

5s, imit., this bill is well calculated to deceive, and the only difference we can detect is in the die on the right end enclosing the figure 5. The genuine has three black circles enclosing the 5. The imit. has only two, and on lower right end figure 8, and on left end series 90.

10s. Paper very light, and the green ink of a lighter shade. Dated March 10th, 1862.

10s alt'd from 1s, portrait of Chase on left.

10s limit. There are 16 small Xs on upper right margin, and only 15 on the genuine. The words "Printed by the National Bk Note Co." on lower left margin extends over 9 of the Xs on imit. and 8 on the genuine.

10s, limit, has 14 small x's on upper right margin—16 on left. The gen. has 15 x's each side of engravers name. Portrait of Pres. Lincoln is very coarse and pale looking; imit. are dated Washington, March 10, 1862, letter C.

20s, very close imit. of gen., the engraving is good, in the center figure the foot of the female can scarcely be seen. On the left end bottom are the words "Payable at the Treasury of the U. S. at New York." The A's in payable are too small and uneven. The letter 'x' in the word 'The' is not crossed in the centre. The imprint is defective; the green ink is of too light a color.

50s, alt'd from 2s, portrait of Hamilton on left centre. The vignettes of the two-dollar and fifty-dollar Treasury note are the same. Ingenious persons are counterfeiting the body of the fifties and using the vignettes of the twos, producing a note that deceives experts.

50s, imit. observe the figures 50 on back of the bill around the margin, the 5 in the imit. runs into the 0, gen. does not. The word 'FIFTY' around the above 50 can scarcely be read. Words 'LEGAL TENDER' is very much blurred. Letter C dated March 3, '63. On the left lower corner the No. 550 instead of 50 enclosed in one circle.

50s, imit., observe the head of Hamilton, upon the face of the note, which represents the line of the waistcoat crossing the white collar at the neck. The acute angle formed by the shape of the collar, so far as it is shown, is perfect in the counterfeit note; but in the genuine the lines of the teeth were drawn by the engraver across the point of the collar at its junction with the waistcoat, for the purpose of relieving the angle of the sharpness it would otherwise have exhibited. This difference is not readily observed unless the notes are perfectly clean. The other discrepancy is in the shape of the ornaments in the border on each end of the face of the bills, and in the whole border on the back. The figures "50" are engraved on a green ground, of which the rim, in the genuine bill, is in octagonal form, rather well defined, though the angles are not sharp. The eight sides of what at first view appeared to be circles, may be easily discerned. In the counterfeit bill the border ornaments, containing the "50" are octagonal in only a very slight degree, and seem to be perfect circles. The general appearance of the counterfeit gives no indication of its true character.

100s, imit. the red figures are much larger than the figures of any Treasury Notes, the wings of the eagle are very coarse—the double rule running from it is heavier, and the curve twice as large, while there is a diagonal shading at the joint of the imprint with the rule, which does not appear on the genuine. On the right end of the back of the bill, the 100 in the circles are inverted, thus, 001. In the genuine this inversion is on the left end. The imprint, American Bank Note Co., is very uneven, and too large.

100s, imit., (2d kind) of the notes issued under the act of February, 1862, well executed. The spurious note is smaller, and the coloring on the back is paler than on the genuine bill. The words "one hundred dollars" on the right hand side of the counterfeit are smaller than on the genuine note.

100s, imit., (3d kind) the note is smaller than the genuine, the spread eagle is very coarse, and the shading of UNITED STATES is badly done. The bill is calculated to deceive.

COUNTERFEIT COUPONS.

The following are the words on the coupons:

"Act of July 17 and August 5, 1861. The United States of America will pay to bearer fifteen dollars for six months' interest due 1st January, 1867, upon bond No. 785, for \$500. L. E. Chittenden, Register United States Treasury."

FIVE CENT COIN COUNTERFEITS

Are in circulation. They may be distinguished from the genuine by the softness of the metal.

COUNTERFEIT FRACTIONAL CURRENCY.

Old Issue.

50s, imit., the portraits of Washington differs one from another; in the genuine they are all alike; the green color looks light and pale.

25s, imit., well executed. Look out.

2d Issue.

10s, imitation. All gen. on the top has the word "Depositories," the imitation reads "Depositories."

50s, imit., have a pale slate color. The small barrels on lower right corner are very indistinct. The gen. have six barrels perfectly clear and plain. Three on lower row, two on next, and one on top. The counterfeit barrels are black, and gen. are white.

50s raised from 5s.

3d Issue.

50c. imit.; two kinds of the new long 50 cent currency. The imitation of one kind has DESIGNATED on upper right corner instead of DESIGNATED. The second kind has designated correctly spelt, but on the little American Shield, under the Eagle, there is a black line drawn across the upright bars of the Shield. Not so on the genuine.

25s, imit., are very pale and coarse. The letter C in cents on left end is smaller than the other letters, and too far off.

New Issue.

25, imitation. Above the words "Treasury Department," on the bottom of the bill in the genuine there is a fine horizontal line—the counterfeits have a straight line.

25s, imit., well executed, but may be detected by the absence of a period (.) after the word Treasurer under Spinner's name; the work is better than any we have previously seen and liable to deceive unless carefully examined.

25s, well executed; head of Chittenden; where it reads "Furnished only by the Assistant Treasurers" the Assistant is spelt "Assistatn." In the genuine the shading of the letter "E" in "Five" is unbroken, while the counterfeit has a little notch in it.

50s, well executed. The engraving on the face of the note is excellent. The adverse is slightly blurred. The notes are an eighth of an inch narrower than the genuine.

50s, the "y" in "Colby's" name crosses a line of the coat in the genuine, but not in the counterfeit.

50s, the line of stars on counterfeit between the figures "50" at the top and bottom of the back of the note have white centres, while the entire stars on genuine are in green. The reading in black on the genuine note clear and distinct, while on the counterfeit the bronze is printed on the black, the words "FIFTY CENTS" being almost obliterated.

50s, well done. The last "e" in the signature of F. E. Spinner is omitted in some, and the (.) after print. on one end, and the d. after March 30.

50s. New and dangerous counterfeits of the last issue of the fifty-cent fractional currency notes, which bear upon their face the head of Treasurer Spinner, have been detected by the Treasury Department. It can be detected by the absence of a period (.) after the word print on the right end, and also under the letter "d" in "March 30," on the left end. The paper is thicker than that of the genuine notes, and the general appearance is calculated to deceive unless closely inspected.

Counterfeit Compound Interest Notes.

50s, imit., Compound Interest Notes, have a scratchy appearance, issue of July 15th, 1864. In the imitation the words "three years after date" on the top of the bill nearly touch the words "Treasury Department," while in the genuine there is a space of $\frac{3}{8}$ of an inch between.

2d. In the imit. the last button of Hamilton's coat is $\frac{1}{4}$ of an inch from the lower margin of the small 50s, while in the gen. the button touches the margin.

100s, Counterfeit 6 per cent. Compound Interest Notes. The engraving as well as the paper and the ink stand the comparison to the genuine. The "U" in "United States" touches the die of the "100" on the left upper corner; on the genuine there is a space of $\frac{3}{8}$ of an inch between.

of the bill being spelled "currency."
